

PARKSIDE

ARCHITECTURAL TILES

2020 / 21

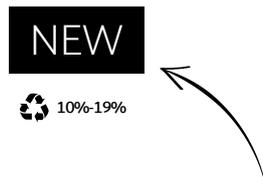

2nd
EDITION

Welcome

If you're looking for some tile inspiration then you've come to the right place. We've designed this brochure to give you an overview of the many collections that we can offer for your next project. To help you browse, we've divided the collections by their look. New collections are being added regularly so please visit parksid.co.uk for the latest additions as well as full details on the collections shown in this brochure.

We've shown the collections that we have samples in stock for. There's plenty more if you have a bespoke requirement so please get in touch.

Enjoy browsing and we look forward to hearing from you.

Keep an eye out for these icons. NEW indicates any collection that has been added since our last brochure. The recycled content gives you an indication of the % for that collection. Please visit our website for further details on each collection as % can vary between different colour options within a collection.

Highlights

p268

Matrix

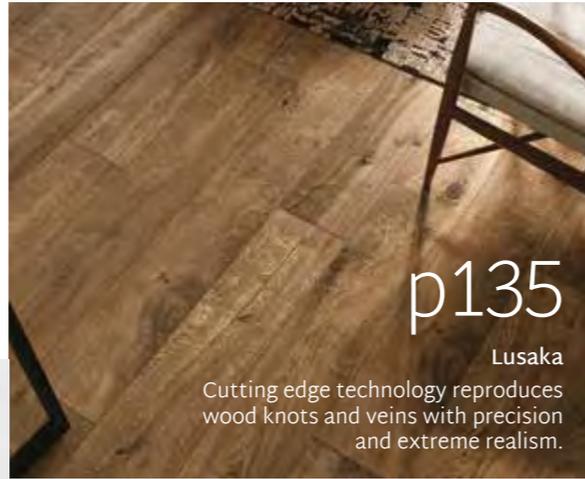

23 tile colours, available in matt or gloss finishes, accompanied by matching grouts and trims.

p202

Spectre

A collection that investigates the reactions of light on different glaze applications including a holographic finish.

p135

Lusaka

Cutting edge technology reproduces wood knots and veins with precision and extreme realism.

p158

Barneby Gates

A collaboration with the leading design duo that sees their stunning patterns on extra-large format porcelain tiles.

p200

Sedgwick

Six geometric and three-dimensional surfaces that are brought to life by light and shadow.

p198

Lenton

Ceramic wall tile collection with ultra-glossy, flawed surfaces in 11 shades.

p290

Chymia

A collaboration between Mutina and Laboratorio Avallone, a Milano-based studio led by Gennaro Avallone.

p238

Velluccia

One of our latest terrazzo collections with a choice of 13 colours and slip resistant finishes.

About Parkside

We're a design-led tile specification company serving architects, designers, contractors and developers in the UK.

For decades we've been a trusted tile source to the UK contract market. We specify contemporary porcelain, ceramic and natural stone tiles for every type of project – from restaurants and hotels to civic buildings and high-end homes.

For us, it's all about providing intuitive service; our architectural consultants have the experience and expertise to understand what our clients want and how to achieve it. Our philosophy is that each new brief deserves a thoughtful, bespoke response; every client is unique and every job is different.

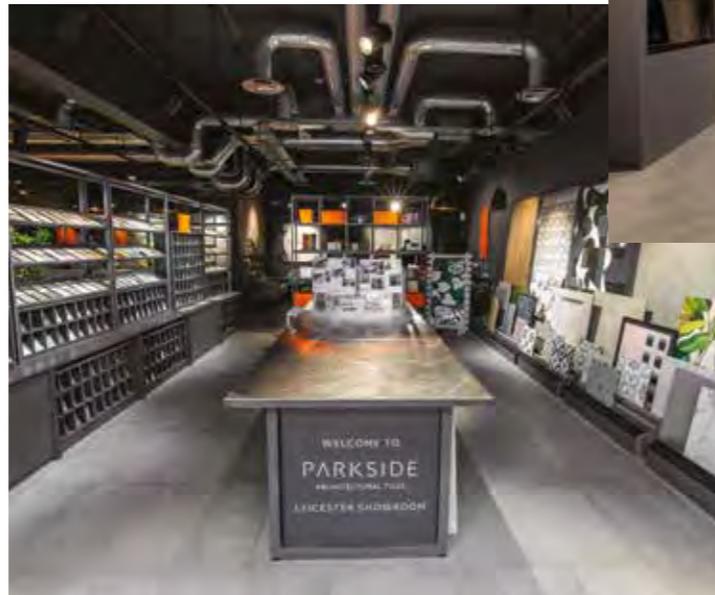

Our team of sales managers have over 200 years combined experience in helping to create original and inventive projects.

Our Design Studios all share the common aim of displaying a wide selection of tiles in relaxed, creative environments that help to inspire our clients. Our most recent Design Studio opened in the Cotswolds and we have plans for more so keep an eye on our website for the latest updates.

Cotswolds

An impressive 300m² of space with displays ranging from extra-large format porcelain slabs to small format collections shown on display boards. A free-standing island unit in the centre of the space houses a meeting room as well as an informal meeting space on top with impressive views out over the rolling Cotswolds hills.

Leicester

An open plan, industrial style space at our head office where large format tile samples sit alongside smaller samples flanked by variations in colour and texture.

Clerkenwell

A light-filled space intended to be used as a hub for the design community with a café, tile gallery, design studio and co-working desks. Fitted out with innovative displays that treat tiles as works of art – more akin to archiving in an art gallery – it will constantly evolve as an organic space through events and exhibitions.

Chelsea

Our first Design Studio is a cosy space full of the latest trends and technologies in tiles. Drop by and enjoy one of our popular coffees while you browse the many designs on show.

Services

Waterjet Cutting

Unlock a world of design possibilities with tiles that can be cut into any shape using the technology of high powered waterjet cutting.

Colour Matching

If you have a RAL or Pantone colour that you want to use on a project, let us know and we can have it printed onto porcelain tiles.

Slip Resistant Floor Tile Testing

All of our tiles are tested for slip resistance by our suppliers and then tested again, in house, by a member of our Technical team, giving you peace of mind when selecting your slip resistant tile. We detail if a finish is slip resistant (PTV 36+) in this brochure or you can visit parksides.co.uk for the latest list.

Digital Printing

Any pattern can be digitally transferred onto full bodied porcelain tiles. We start off with a generic base colour and work with our fabrication partners to develop the pattern you require.

Porcelain Worktops

12mm porcelain worktops are available in sheets of 3200x1600mm in a multitude of beautiful stone, wood and marble finishes. Porcelain is the perfect non-staining, heat-resistant, scratch-proof product for any surface. We offer a full service from design ideas to quoting, from drawings through to templating and fixing.

Bespoke & Handmade Tiles

We love working closely with our clients to develop bespoke tiles that add a true uniqueness to a scheme. These tiles can be designed collaboratively and then produced using traditional press methods, or they can be handmade, making each tile a work of art.

Digital Services

It's clear that digital connectivity between suppliers and the design community will be more important than ever moving forward so we continue to add digital tools to give you access to as many of our resources from wherever you are working. Visit the Services section of our website for more details.

Video Design Consultations

If you aren't able to travel to one of our Design Studios then let us come to you! We can now video call you from your preferred Design Studio and show you around our many tile displays, answering any questions you may have.

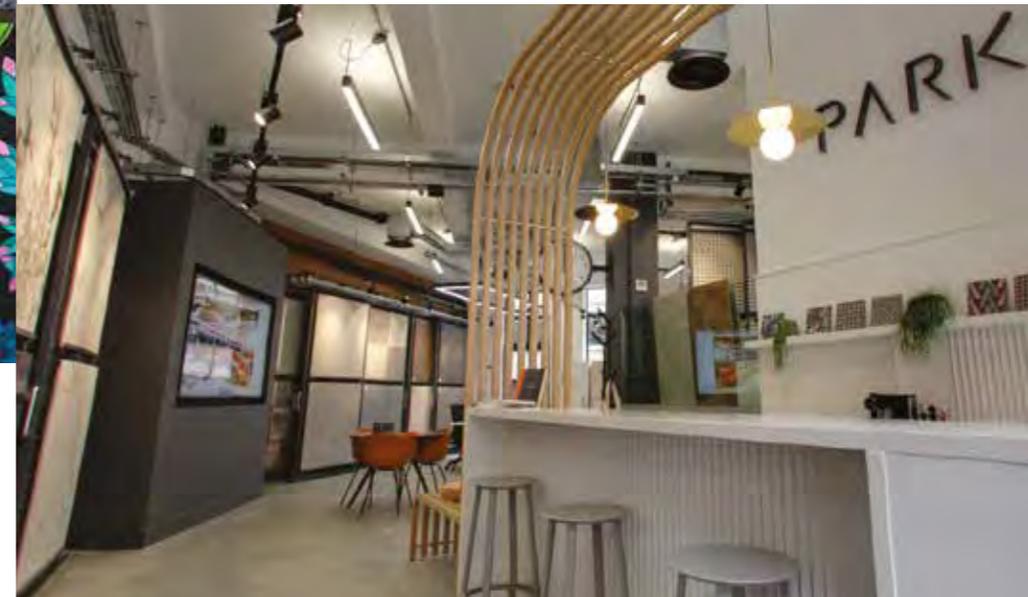

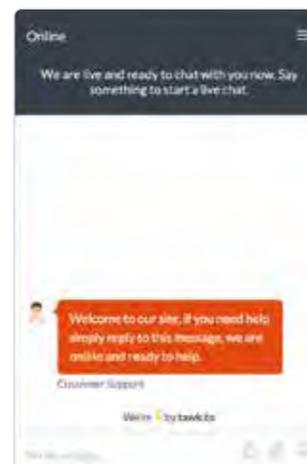

5 Minute Sample Selector

A quick and simple tool that tells our team what kind of tiles you're looking for. They'll then pick the most suitable options from our many collections and send you samples for consideration.

Online Chat

One of our team is online from 9am-5pm Monday to Friday to assist with your queries. If they can't help directly then they'll direct your query to the best member of our team to help. Just click on the chat icon in the bottom right hand corner of our website.

360 Tours

If you'd rather browse our Design Studios in your own time then you can now virtually visit them through our 360 Google Tours. Take your time as you move around the Studios, take in our displays and the many beautiful tiles on offer.

Projects

Our wide range of products have been cleverly used in many different projects to create inspiring results. We've shown just three of our most recent here. Visit parksid.co.uk to see more.

Silk District, Whitechapel

Mount Anvil

Tiles used were developed specifically for this project to suit a brief of introducing a touch of Italian influence with a terrazzo effect option. The Mount Anvil team visited the factory to develop a bespoke design that met their expectations in terms of design but also had high slip resistance.

Juno Rooms, London

Harrison

Tiles used: Kaste01 (see page 22) and tiles specifically sourced for this project including a handmade bespoke ceramic tile in a geometric pattern of colour-matched green tones.

Photography by Leon Hargreaves.

Burger King, various locations

Brown Studio

Tiles used were specifically sourced for this project including options that fit in with the Burger King brand colours.

Photography by Adam Parker.

Getting the Look

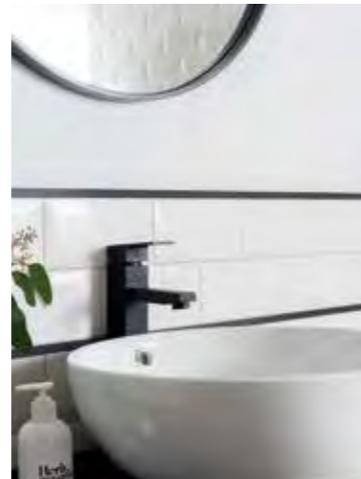

There's more to consider than just your choice of tiles. Grout colours, trims, movement joints and stair nosing profiles all play their part in the finished look.

We partner with industry-leading brands like BAL and Ardex to offer a complete tiling solution including over 20 different grout options.

Foundry trims are just one of the collections of trims that we offer. An original collection of luxury brass trims, each one is individually handcrafted, treated and finished to create an authentically aged look.

Other trims include hammered metal effect, wood effect, marble effect and matt black options.

Use as conventional tile trims to provide a flawless edge to any tiled area.

© Mark Cocksedge

Experiment by introducing trims into your design in creative ways such as within the grout joint as shown here.

Request one of our Matrix sample boxes to see the coordinating grouts and trims.

Our Fauve collection (see page 196) was designed using the Design Lab.

Design Lab

Design your own tiles for your next project with our Design Lab in three easy steps:

Step 1

Choose your preferred size from 40 different options including chevrons and hexagons.

Step 2

Choose your colour from a palette of RAL and Pantone references.

Step 3

Choose from a matt, gloss or crackled finish.

Submit your design with some contact and project information and we'll get back to you with a quotation.

Visit www.parkside.co.uk/designlab to get started.

Outdoor Vista20

With a variety of stone, wood and fossil effect finishes, these 20mm thick, vitrified porcelain slabs give you an elegant appeal without the usual maintenance. Extremely hard wearing, frost, mould and stain resistant, they have high slip resistance with a PTV rating of 36+.

Patterned

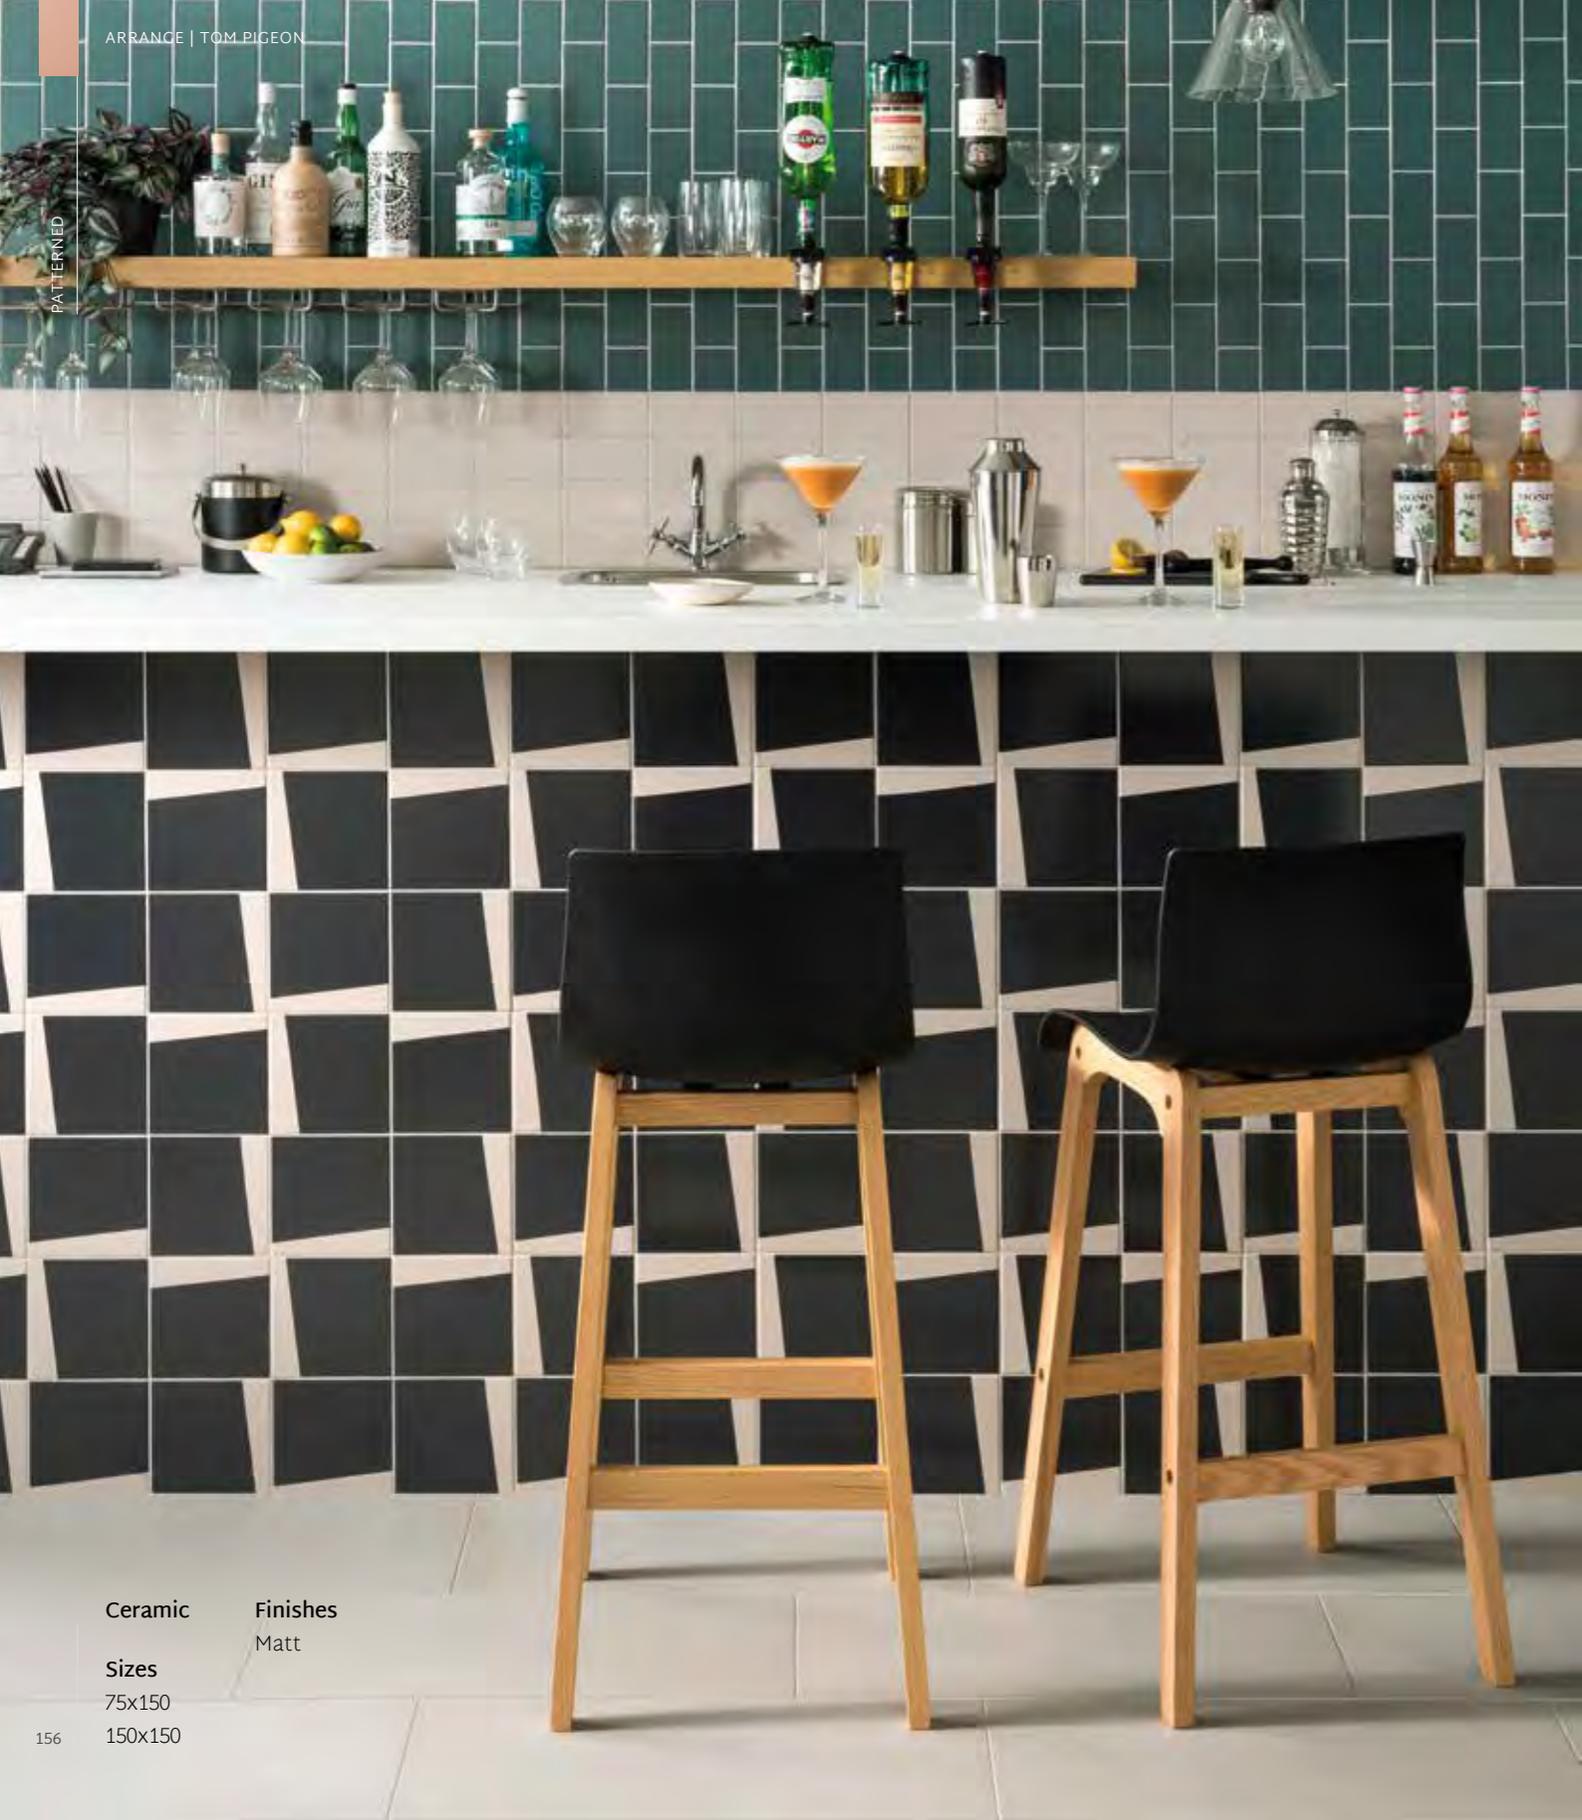

TOM PIGEON | ARRANGE

Traditional tile motifs have been pared back to simple geometric forms – taking a decorative tile and paring it back to a minimal ‘dot’ or simplifying a shield or crested tile back to an ‘arc’ or abstracted ‘apex’ design. This created a series of tiles which could be used in all kinds of ways.

In playing with this collection of tiles, Tom Pigeon have reinterpreted traditional vestibule wall patterns with repeating borders and panels of flat colour, and created more modern abstract options which feel more like fragments of colour and shape. You could also tessellate the same tile to create new motifs and repeat patterns.

The possibilities are endless.

They fell in love with the rich dark greens, soft mint, rose pinks, charcoal and powder blue of classic Victorian tiles and the endless combinations of original encaustic floor tiles. They knew that this was an opportunity to create a playful experience, one that is exciting for the user, allowing them to create something unique and personal.

Minton Hollins

Minton Hollins specialises in fine ceramic tiles which have been produced in the UK for over 150 years. Choose from highly-patterned features, delicate pictorials, rustic country engravings or displays of dramatic colour. With an array of choices available, this authentic collection brings you a beautiful collection of design solutions for any style setting.

The brand originated when the Minton family, who were heavily influenced by the Arts and Crafts movement and its pretty, rich-coloured, intricate flora and fauna patterns, began translating ornamental tableware designs inspired by William Morris and William De Morgan onto ceramic tiles - and in doing so established Britain's love of decorative tiling.

Exclusive to Parkside in the commercial sector, visit parkside.co.uk for full details.

The background of the entire page is a dense, granular texture representing a terrazzo effect. It consists of a dark, charcoal-colored matrix interspersed with numerous small, irregular fragments of various colors, including shades of brown, tan, grey, and off-white. The fragments vary in size and shape, creating a complex, multi-colored pattern.

Terrazzo Effect

Velluccia

Over the centuries, the Venetian terrazzo tile has brought prestige to villas and palazzos with extraordinary beauty in Italy's Veneto region and around the world. The Velluccia collection reworks this noble tradition from a contemporary angle.

Leon d'Oro

Leon d'Oro is inspired by the original flooring in the Italian restaurant that shares the same name. The three luxurious colours are each complemented by a decorative piece crossed by golden lines inspired by ancient Euclidean geometrical shapes.

Mutina

Designers

Patricia Urquiola

Patricia Urquiola was born in Oviedo, Spain, but has lived and worked in Milan for over 20 years. After her graduation in 1989, she worked for Achille Castiglioni, collaborated with Vico Magistretti and was Head of Design at Lissoni Associati. She opened her own studio in 2001, working in product design, interior design and architecture. She realised retail and fitting projects for Gianvito Rossi, BMW, Flos, Missoni, Moroso, Officine Panerai, H&M, Santoni and Pitti Uomo Firenze and won numerous international prizes including: Medalla de Oro al Mérito en las Bellas Artes and the Order of Isabella the Catholic, awarded to her by King Juan Carlos I of Spain, 'Designer of the Decade' and 'Designer of the Year'.

Tokujin Yoshioka

Tokujin Yoshioka was born in Japan, where he trained with Shiro Kuramata and Issey Miyake and opened his own studio in 2000. The success of his Honey-pop paper chair in 2001 brought him to develop designs for Driade, Moroso and Kartell among others. The signature feature of his creative approach is the dream-like quality of his work, which stems from attentive and sophisticated selection of simple materials combined with technological experimentation. His awards include Design Miami, Designer of the Year 2007, Wallpaper Design Awards 2008 and Elle Decoration International Design Award, Designer of the Year 2009. Among the several prizes for his Phenomenon collection designed for Mutina, in 2011 he received the Wallpaper Design Award and the Elle Decoration Design Award.

Edward Barber and Jay Osgerby

Barber and Osgerby opened their London studio in 1996, having graduated from the Royal College of Art in London. Their multidisciplinary approach pushed the boundaries of industrial design, architecture and art. Their work includes collections for Knoll, Vitra, B & B Italia, Cappellini, Venini and Flos, limited edition pieces and commissions such as the London 2012 Olympic Torch and the £2 coin designed for the Royal Mint. The first extensive monograph on the pair was published by Rizzoli New York in 2011. They are both Royal Designers for Industry (RDI) and Honorary Doctors of Art. Their work is included in the permanent collections of museums around the world, such as the V&A and Design Museum in London, the Metropolitan Museum of Art in New York and Chicago's Art Institute.

Ronan and Erwan Bouroullec

The collaboration between Ronan and Erwan Bouroullec is a permanent dialogue nourished by their distinct personalities. They design for many manufacturers, including Vitra, Kvadrat, Magis, Kartell, Established and Sons, Ligne Roset, Axor, Hay, Nanimarquina, Issey Miyake and Cappellini, and often embark on occasional architectural projects. They simultaneously continue their experimental activity at Galerie Kreo, Paris. Their work has been recognised with many awards including designers of the year at the Paris Salon du Meuble in 2002, the Finn-Juhl Prize, in Copenhagen in 2008, two "Best of the Best" Red Dot Design Awards and the Panerai London Design Medal in 2014. Several exhibitions have showcased their works and their creations are part of the permanent collections of several international museums.

Raw Edges

Both born in Tel Aviv, Yael Mer and Shay Alkalay moved from Jerusalem to London where they founded the Raw Edges Design Studio. Yael likes to fold slim layers of all sorts of material as if they were paper, creating curved volumes and functional forms, while Shay has a passionate interest in the way things move, function and interact. These two different approaches combine in the creation of original projects, characterised by a keen sensitivity towards the environment. In 2009 they received the Elle Decoration International Design Award for Stack by Established & Sons and the Designers of the Future Award in the furniture section at Design Miami/Basel. They work with a number of international brands and producers, such as Cappellini, Established & Sons, Moroso, Kvadrat, Stella McCartney, Arco, Golran, Moustache and Lema. Their work is part of the permanent collections in several international museums.

Laboratorio Avallone

The research carried out by Laboratorio Avallone reaches into the applied arts, drawing on the arts of painting and sculpture to create unique and very special objects of contemporary furnishing. A defining characteristic of these products, which has led to their international fame, is the inclination to use surfaces with very distinctive and deep textures, both engraved and embossed, highlighting the material itself. The epicentre of the design team is Gennaro Avallone, a master and experimenter, who for over twenty-five years has been continually exploring the limits and possibilities of surfaces with meticulous research that strives to create excellence.

Chymia

An exclusive collection, Chymia by Mutina is the result of a collaboration with Laboratorio Avallone, a Milano-based studio led by Gennaro Avallone.

The collection consists of a series that fluctuates between the discipline of graphic design and the expressive gestures of mark-making as well as between the two extremes of black and white, in which symbols and textures are combined to create patterns of light and shadow on the surface.

Puzzle

Designed by Edward Barber and Jay Osgerby for Mutina, Puzzle is a mixture of block colours and multi-coloured graphic patterns.

“The Puzzle collection is a game with infinite outcomes. The simple geometric shapes become softer and more fluid as the puzzle grows, allowing patterns to ebb and flow. Objects emerge like maps, islands or clouds, with endless possible permutations, meaning that whenever Puzzle is used it will always be unique.”

Edward Barber & Jay Osgerby
