7 COLOURS / 6 SIZES / 3 FINISHES / 28 SPECIAL PIECES

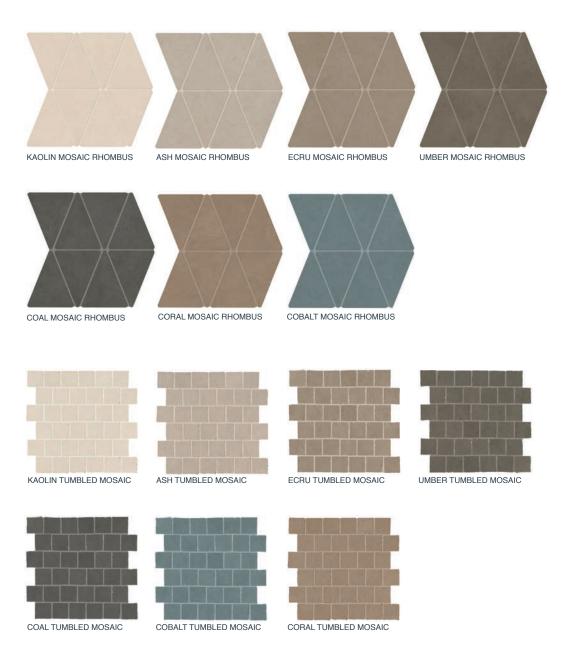

A concrete effect tile, Dawson Natural was born from the influence of raw earth and the creativity of Italian architecture. Viewed from afar, the surfaces of Dawson Natural convey a neutral, powdery look, opaque in the light, with slight colour variations. On closer inspection, they reveal the random but subtle marks of manually worked raw earth with slight irregularities to the hand and eye.

The colour representations shown in this data sheet are as accurate as the limitations of the printing process will allow. Due to the manufacturing process of our floor tiles there may be a small variation in the PTV value. The slip resistance values are correct at the time of testing and represent the standard production value. Inadequate cleaning and maintenance will lead to significant reduction in the slip resistance of any tiles. The pendulum test results have been displayed in line with H&S Executive guidelines whereby 0-24 represents high slip potential, 25-35 moderate slip potential & 36+ represents a low slip potential.
