

LAMINATE SHOWER WALL PANELS

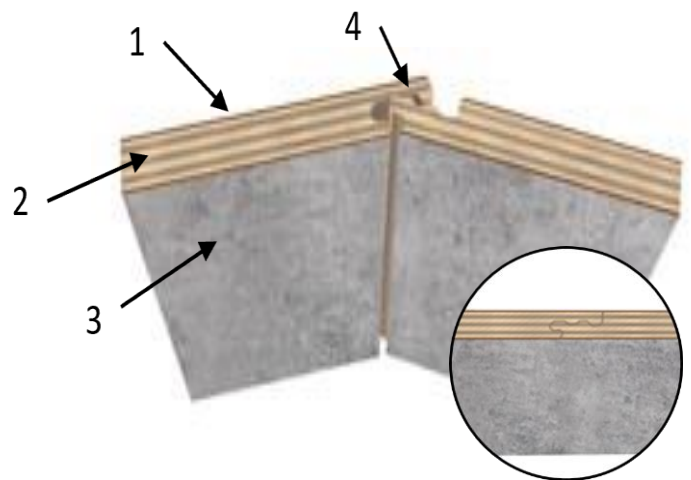

LAMINATE INFORMATION

Create beautiful wall spaces with our waterproof laminate bathroom panels which provide a cost effective, easy to fit solution for shower and wet rooms for a stunning effect and finish.

Combine bathroom panels with our wide range of tiles to provide our customers with a complete bathroom design which creates an opulent, trendy and functional look.

1. Laminate backing layer provides a waterproof backing to the panel
2. Exterior grade MDF core – lightweight and durable
3. Decorative laminate surface provides a waterproof surface – available in a range of designs
4. Hydrolock click system – an innovative click system which ensures a watertight seal between panels

USPs

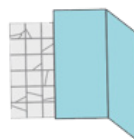

100% waterproof

Easy to clean and maintain – no grout joints to discolour or become mouldy

FSC exterior grade MDF core

Panels can be fitted over existing tiles

Range of on-trend designs

30 year warranty provides peace of mind

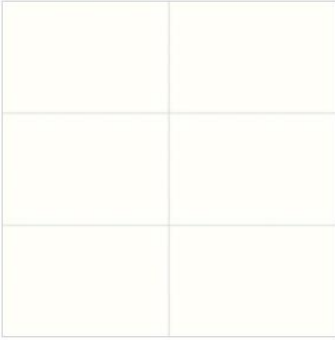

Hydrolock system - creates a discreet and watertight joint

100% of panels are recyclable

ESSENTIALS

ADHESIVES & SILICONE SEALANTS

The high quality Multipanel High Grab Adhesive and Sealant is specifically developed for our range of laminate bathroom panels to ensure a secure bond between the panel and wall substrate. The adhesive is applied using a standard cartridge gun in a snake like pattern down the back of each panel – a full tube is required for each panel.

Multipanel Silicone Sealant is available in the following colours:

WHITE

CREAM

LIGHT GREY

DARK GREY

CLEAR

INTERNAL CORNER PROFILE

The internal corner allows for two laminate bathroom panels to be joined at a right angle whilst showcasing the colour of the trim. Available in the following finishes:

WHITE

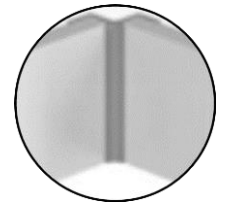

SATIN

POLISHED

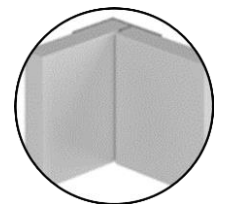

BLACK

INVISIBLE CORNER PROFILE

Unlike the internal corner, the invisible corner connects two laminate bathroom panels at a right angle but without the trim showing, creating a profile free finish. Simply slot the panels into place and seal with your chosen colour of sealant. This profile is only available in matt aluminium as it's not seen once the panels are installed.

FLUSH CORNER PROFILE

Designed to join two panels together, the flush corner is versatile and multi-purpose as it can be used for both internal and external corners. Available in the following finishes:

WHITE

SATIN

POLISHED

BLACK

ESSENTIALS

ANGLE PROFILE

The angle profile is versatile and multi-purpose, providing the perfect finishing touch for boxing in, window reveals, doorways and external corners. Install the profile after the panels have been fitted for a neat finish in no time. Available in the following finishes:

WHITE

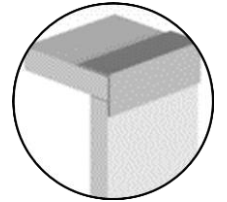

SATIN

POLISHED

BLACK

END CAP PROFILE

The end cap profile provides a finishing touch to the bathroom panel installation as well as protect the panel against water ingress. Available in the following finishes:

WHITE

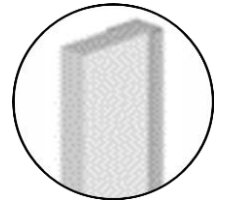

SATIN

POLISHED

BLACK

WALL / FLOOR PROFILE

The wall / floor profile, or base profile, is designed to discreetly fit along the bottom edge of a wall and offers protection from water ingress. The profile comes in a standard satin finish only as it will not be seen once the bathroom panels are installed.
