

# PVC SHOWER WALL PANELS

PARKSIDE

# PVC DESIGNS

Designed for walls, PVC shower wall panels are a stylish and cost effective alternative to tiles.

The PVC panels are 100% waterproof, making them perfect for showers, bathrooms and wetrooms.

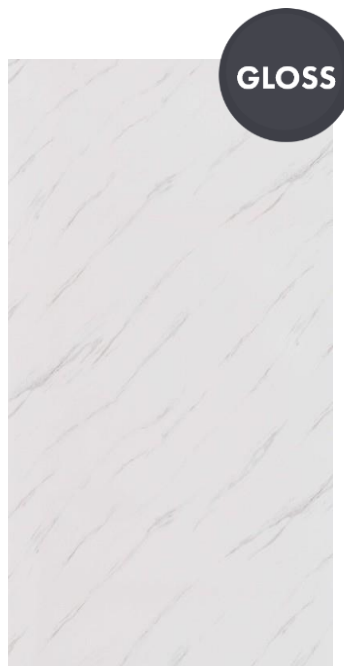

The 10mm thick cellular PVC structure ensures the panels are hardwearing yet lightweight.

The 100% waterproof panels create a fashionable and functional wall covering that's ideal for shower enclosures, bathrooms and wetrooms.

Smooth and easy to clean, with no grout joints, the hygienic, non-porous surface of the PVC shower wall panels provide excellent protection against bacteria and stains whilst being resistant to mould.

Showerwall Panel Adhesive is a hybrid polymer grab adhesive specifically created for use with PVC panels packed in a 350ml cartridge.

- Internal & External use
- Fast curing
- Solvent free
- Waterproof
- UV resistant
- Chemical resistant

Use 1 tube for every panel being installed

# PVC MAINTENANCE

## CARE & MAINTENANCE

Once installed, your PVC panels only require occasional ongoing maintenance using a suitable PVC Antibacterial Cleaner such as BAL Micro-Shield Plus.

**PLEASE NOTE:** Abrasive cleaners and bleaches **MUST NOT** be used on PVC shower wall panels as this can damage the decorative layers of the panel.
